

Algebraic Language: Constants Answer Sheet

What is a constant?

- A constant is a number.
- It always stays the same.
- It is fixed.

Example

Key Step: The constant is a number.

Expression: $2 + x$

Constant: 2

Why? It is a number. It is fixed and it always stays the same.

Key Word

Constant:
a fixed number

Answers (Constants)

Write the constants for each expression.

| | Expressions | Constants |
|-----|-------------|-----------|
| (1) | $x + 5$ | 5 |
| (2) | $3y + 2$ | 2 |
| (3) | $4 - n$ | 4 |
| (4) | $d + 7$ | 7 |
| (5) | $4 + b + 2$ | 4 and 2 |

Tip

A constant is always a number.
